JOURNAL OF EXPERIMENTAL MARINE BIOLOGY AND ECOLOGY

Contents of Volume 200

Editorial v

A.J. Underwood (Australia)
Detection, interpretation, prediction and management of environmental disturbances: some roles for experimental marine ecology 1

S.N. Luoma (USA)
The developing framework of marine ecotoxicology: pollutants as a variable in marine ecosystems? 29

M.H. Depledge (UK)
Genetic ecotoxicology: an overview 57

T.J. Hilbish (USA)
Population genetics of marine species: the interaction of natural selection and historically differentiated populations 67

R.S. Burton (USA)
Molecular tools in marine ecology 85

M.E. Hay (USA)
Marine chemical ecology: what's known and what's next? 103

P.W. Sammarco (USA)
Comments on coral reef regeneration, bioerosion, biogeography, and chemical ecology: future directions 135

R.F. Dame, D.M. Allen (USA)
Between estuaries and the sea 169

S.Y. Newell (USA)
Established and potential impacts of eukaryotic mycelial decomposers in marine/terrestrial ecotones 187

J.E. Eckman (USA)
Closing the larval loop: linking larval ecology to the population dynamics of marine benthic invertebrates 207

J. Grant (Canada
The relationship of bioenergetics and the environment to the field growth of cultured bivalves 239

J.D. Gage (UK)
Why are there so many species in deep-sea sediments? 257
